Dialogue Systems 2

Final Project

Elisa Beihofer

Testing RAG vs. LLM-only system

Reloaded page in-between each test (testing responses, not system functionality)

Had each conversation three times

- Only recorded generated part for the second and third repetition of each conversation

Tried to keep my wording as similar as possible between each attempt with each system

	System	**User Answer**
Test 1: Common idiom with explicit context		
RAG	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	What does break the ice mean? My teacher said we should play a game to break the ice on the first day of class
	So, when your teacher said "break the ice," it means they want to start a conversation or play a game to make everyone feel more comfortable and relaxed in the class, especially on the first day. It's like a way to create a friendly atmosphere and get to know each other better.	
	In this situation, "break the ice" means to start a conversation or activity to make everyone feel comfortable and relaxed, especially when they're not knowing each other well. Your teacher likely said this to suggest playing a game as a way to ease any initial awkwardness or shyness	

	that students might feel on the first day of class.	
	So, "break the ice" means to start a conversation or activity to make people feel more comfortable and relaxed around each other. It's like a warm-up to make everyone feel at ease. In this situation, your teacher wants to play a game to start a conversation and make you all feel more relaxed and friendly with each other, especially since it's the first day of class.	
	Anything more?	No, thank you
	Thank you for exploring idioms with me! Click to ask again.	
LLM	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	What does break the ice mean? My teacher said we should play a game to break the ice on the first day of class
	"Break the ice" means to do something fun and relaxed to help people get to know each other and feel more comfortable when they first meet. Your teacher's intention is to make the first day of class more enjoyable and friendly, so everyone can feel welcome and start talking to each other.	
	When your teacher says "break the ice," it means to do something fun and casual to help people feel more comfortable and relaxed in a new situation, like a new class. So, in this case, playing a game is a way to help everyone get to	

	know each other and feel at ease.	
	"Break the ice" means to do something to relax people, especially in a new or formal situation, like a class. It's like a gentle warm-up to help everyone feel more comfortable. In this situation, your teacher wants you to play a game so that everyone gets to know each other better, feels less nervous, and has fun. The game is helping to "break the ice" and set a positive tone for the rest of the class.	
	Anything more?	No, thank you
	Thank you for exploring idioms with me! Click to ask again.	
	Test 2: Idiom without context	
RAG	...	Uh, what does spill the beans mean?
	Where did you hear this expression, or how was it used?	I don't have a context for it.
	No worries, I'll give you an example.	
	Here's an example: Can't wait to spill the beans about my new project next week! #excited. In this example, "Can't wait to spill the beans about my new project next week!" means the speaker is excited to share a secret about their new project with others. They're looking forward to revealing the information, and they're building anticipation with the phrase "Can't wait".	

	Here's an example: Can't wait to spill the beans about my new project soon! #Excited In this example, the speaker is saying they're excited to share secret information about a new project, but they're doing it in a way that's already revealed some of the information. The speaker is "spilling the beans" by talking about it, which means they've accidentally or prematurely shared something they shouldn't have yet. The tone is one of enthusiasm and eagerness, but also possibly a bit of nervousness about being too open.	
	Here's an example: Can't wait to spill the beans about my new project soon! #Excited In this example, the speaker is using "spill the beans" to mean they're going to reveal a secret about their new project soon. They're being playful and anticipatory, building up excitement by hinting that they'll share the information soon.	
	Anything more?	No
	…	
LLM	…	What does spill the beans mean?
	…	I don’t have context.
	No worries, I’ll give you an example.	
	"Spill the beans" is an idiom that means to reveal a secret or surprise prematurely, often in a way	

	that's unwanted or not intended. It's usually used when someone accidentally shares confidential information before it's meant to be shared.	
	"Spill the beans" is an idiom that means to reveal a secret or surprise prematurely, usually when someone was meant to keep it a secret. Example: "I was going to surprise my sister with a birthday party, but I think I might have spilled the beans when I mentioned it to her best friend."	
	Example sentence: "I was supposed to surprise my sister with a birthday present, but my little brother accidentally spilled the beans and told her it was going to be a cake." Explanation: The speaker used the idiom "spill the beans" to mean that someone accidentally revealed a secret or surprise. In this situation, the speaker's sister didn't get to experience the surprise of the birthday gift as planned, because her brother let it out.	
	Anything more?	No.
	...	
Test 3: Ambiguous idiom in context		
RAG	...	What does on the fence mean? My friend hasn't decided whether to accept a job offer
	In this situation, "on the fence" means your friend is undecided about the job	

	offer and hasn't made a decision yet. They're not leaning towards accepting or rejecting the offer.	
	In this situation, "on the fence" means your friend is undecided or hasn't made up their mind about accepting the job offer. The speaker, likely a concerned friend or family member, might say: "I feel like they're on the fence about the job offer. They're not really committed to taking it or turning it down."	
	In this situation, "on the fence" means your friend is undecided or hasn't made up their mind about whether to accept the job offer. They're not strongly for or against it, but neither are they certain yet.	
	Anything more?	No, that's all.
	...	
LLM	...	What does on the fence mean? My friend hasn't decided whether to accept a job offer
	"On the fence" means your friend is undecided or hasn't made up their mind. They're not for or against the job offer, they're just waiting to see which way they want to go. The speaker is likely expressing concern that your friend is taking too long to decide, making it harder for the person offering the job to move forward.	
	When your friend is "on the fence," it means they're undecided or hesitant about making a decision. They're not leaning	

	towards accepting the job offer, but they're not rejecting it either. Speaker's intention: The speaker might be trying to express that your friend is uncertain about the decision, and they're waiting for more information or time to make up their mind. Example: "I think Sarah's still on the fence about the job offer. She hasn't made a decision yet."	
	In this situation, "on the fence" means your friend is undecided or unsure about making a decision, neither leaning towards accepting nor rejecting the job offer. Your speaker likely means they think your friend is taking their time to consider the offer and might need more convincing to make a choice. If the speaker is not you, they might be trying to suggest that your friend should decide sooner rather than later.	
	Anything more?	No, that's all.
	...	
Test 4: Potential literal use of an idiom		
RAG	...	What does break a leg mean?
	Where did you hear this expression, or how was it used?	I heard it when someone fell during a football match
	"Break a leg" means good luck, especially before a performance or event. It's an informal way to wish someone success without actually saying 'good luck'. In the situation you described, it's likely the	

	speaker is sharing what they heard someone say, but they're not saying it's a common phrase used in that context. The speaker might be expressing surprise that someone would say "break a leg" in a football match, implying it's not a typical phrase used in sports, but rather in performing arts or other competitive events.	
	In that situation, "break a leg" means the opposite of what it would normally say. Instead of wishing someone bad luck, it's actually a way to wish them good luck. The speaker is likely saying this as a way to be friendly and supportive, even if the person fell during the match.	
	In that situation, 'break a leg' means the opposite of what it typically means. Instead of wishing someone good luck, it sounds like the person is wishing them bad luck or injury.	
	Anything more?	No
	...	
LLM	...	What does break a leg mean?
	Where did you hear this expression, or how was it used?	I heard it when someone fell during a football match
	In this situation, "break a leg" is an idiom that means "good luck." When someone hears this phrase, it's often used to wish someone well before a performance or a challenging situation, like a	

	football match. So, if someone says "break a leg" in this context, they're actually wishing the person a successful and non-injuring performance.	
	In this context, "break a leg" means "good luck". It's an old-fashioned phrase that's still commonly used to wish someone success, especially before a performance or a challenging situation. The speaker is likely wishing the person who fell well, not literally wishing them to break a leg. It's a way of expressing encouragement and support.	
	When someone says "break a leg" in a situation like this, they actually mean "good luck". It's a way of wishing someone success, especially in a performance or competition, like a football match. So, the speaker is expressing a positive sentiment, not literally wishing the person injury.	
	Anything more?	No
	...	
	Task 5: Less common idiom	
RAG	...	Explain Cut the Gordian knot
	Where did you hear this expression, or how was it used?	I don't have a context for it
	No worries, I'll give you an example.	

	Here's an example: "This project is stuck in endless debates," said Maria. "Sometimes you just have to cut the Gordian knot and make a bold decision." In the example, Maria suggests making a bold decision to end prolonged discussion about a project. She uses the idiom "cut the Gordian knot" to mean taking a decisive action that solves the complicated problem quickly, rather than getting bogged down in details.	
	Here's an example: "This project is stuck in endless debates," said Maria. "Sometimes you just have to cut the Gordian knot and make a bold decision." In the example, Maria uses "cut the Gordian knot" to describe solving a complex project issue. She implies that instead of spending a lot of time on discussions, one should make a bold decision to move forward. The speaker is suggesting a direct approach to overcome a stuck situation, much like Alexander the Great's solution to the complex knot.	
	Here's an example: "This project is stuck in endless debates," said Maria. "Sometimes you just have to cut the Gordian knot and make a bold decision." In this example, Maria uses the idiom "cut the Gordian knot" to suggest making a bold decision to end a	

	prolonged debate. She's saying that sometimes, you need to take a decisive action to solve a complex problem quickly, rather than getting stuck in endless discussion.	
	Anything more?	I don’t know (wrong: said “No”)
	Sorry, I didn't understand. Could you rephrase that?	I said no
	Thank you for exploring idioms with me! Click to ask again.	
LLM	…	Explain Cut the Gordian knot
	Where did you hear this expression, or how was it used?	I don’t have a context for it
	No worries, I'll give you an example.	
	"Cut the Gordian knot" is an idiom that means to solve a complex problem by finding a creative or unexpected solution. For example, if you're stuck on a tricky math problem, you might say, "I just cut the Gordian knot and figured it out!"	
	Cutting the Gordian knot means solving a difficult problem or conflict. Imagine you're trying to untangle a knot in a rope. If you try to pull on both ends, it just gets tighter. But if you cut through the middle, the knot comes undone. That's what the idiom means: finding a way to solve a tough problem by finding a creative solution, rather than struggling with it.	

	"Cut the Gordian knot" is an idiom that means to solve a complex problem or difficulty by finding a creative or unexpected solution. It's called after King Gordius of Phrygia, who tied a complex knot in his chariot, and a hero named Alexander the Great who, instead of cutting the knot, solved it by cutting through the rope on the other side. To "cut the Gordian knot" means to break free from the complexity and find a simple, effective way out.	
	Anything more?	No
	Thank you for exploring idioms with me! Click to ask again.	
Task 6: Request more details		
RAG	...	What does bite the bullet mean? My colleague said that we should bite the bullet and pay for the repairs
	In this context, "bite the bullet" means to accept and deal with the unpleasant situation, which is the cost of the repairs. It's like your colleague is saying, "Let's face the expense and fix the issue." They're suggesting you should be honest about the cost and pay for the repairs, rather than avoiding or delaying the payment.	
	In this situation, "bite the bullet" means to accept that you have to pay for the repairs, even though it's not ideal or you might not be able to afford it.	

	Your colleague likely wants you to accept the expense as a necessary step, even if it's unpleasant or costly.	
	In this situation, "bite the bullet" means to accept and deal with an unpleasant or difficult situation, in this case, paying for repairs. Your colleague is suggesting that it's better to pay for the repairs now rather than putting it off. The speaker's likely intention is that they think it's more practical or cost-effective to pay for the repairs immediately, rather than delaying the payment or exploring alternative solutions.	
	Anything more?	Yes. Can you tell me more about this idiom?
	The idiom "bite the bullet" comes from the military practice of giving soldiers a bullet to bite on before undergoing a painful medical procedure, like amputation. This helped them cope with the pain. Now, it's used to describe facing a difficult or unpleasant situation, like paying for repairs, and accepting it to move forward.	
	The idiom "bite the bullet" is idiomatic, meaning its meaning isn't literal. It comes from the past when soldiers were given a bullet to bite on during surgery to help them cope with the pain. Now, it's used figuratively to mean	

	enduring a difficult or unpleasant situation, like paying for repairs.	
	The idiom "bite the bullet" is idiomatic because its meaning can't be deduced by literally interpreting the words. Historically, it refers to enduring pain by literally biting a bullet, and now it figuratively means accepting hardship to proceed. This idiom is formal and neutral, making it suitable for most professional and formal conversations. However, I wouldn't recommend using it in very casual conversations, as it might sound too formal or old-fashioned.	
	Anything more?	No, that should be all
	...	
LLM	...	What does bite the bullet mean? My colleague said that we should bite the bullet and pay for the repairs
	In this situation, "bite the bullet" means to accept a difficult or unpleasant situation, like paying for repairs, and deal with it. In the past, a bullet was used as a surgical gag to prevent patients from screaming during medical procedures. To "bite the bullet" meant to endure pain or discomfort. So, when your colleague says you should "bite the bullet" and pay for the repairs, they're suggesting you should be brave and	

	accept the expense, even if it's not pleasant.	
	When your colleague says "bite the bullet," it means to accept a difficult or unpleasant situation and deal with it. In this situation, your colleague is likely suggesting that you should pay for the repairs, even if it's not convenient or costly, because it's the right thing to do. So, "bite the bullet" is an idiom that means to take a bitter pill or a difficult decision, and do what's necessary.	
	"Bite the bullet" means to accept and endure a difficult or unpleasant situation, often a painful or unpleasant one. In your situation, your colleague is suggesting that you should pay for the repairs, which might be a financial burden, so they want you to accept it and deal with it. They're likely trying to tell you to be practical and not avoid the expense.	
	Anything more?	Yes. Can you tell me more about this idiom?

	Here are some additional details: 1. The idiom is idiomatic, meaning its meaning is not literal. It's a fixed expression that's different from the literal meaning of the individual words. 2. It's formal and somewhat old-fashioned, so it's not commonly used in informal conversations. You're more likely to hear it in formal writing, like business letters or in formal conversations between colleagues. 3. Mastering this idiom might be a bit challenging for language learners, as it requires understanding the historical context and the figurative meaning of the words. 4. A nuanced meaning of "bite the bullet" is that it's not just about tolerating something unpleasant, but also about being proactive and taking action to deal with it. It's about showing courage and responsibility. Does that help?	
	"Bite the bullet" is an idiomatic expression that originated during the 19th century, when soldiers were given a bullet to bite on before a painful medical procedure, like amputation. It was a way to distract them from the pain. Now, in modern language, we use the phrase to describe situations where	

	someone has to make a difficult decision or face an unpleasant reality. It's often used when something is necessary, even if it's not popular or easy.	
	Here are a few more details: 1. It's an idiomatic expression, which means its meaning isn't exactly what the individual words say. The phrase is derived from the idea that in the 19th century, a bullet had to be bitten to be swallowed, often a painful process. 2. It's usually used in a more formal or professional setting, such as in business or medicine. It's not a common phrase in casual conversations. 3. While the idiom itself might not be difficult to understand, learning its context and usage can take some practice for language learners. It's a good example of an expression that requires nuance and understanding of the situation it's being used in. 4. One additional nuance is that "bitten the bullet" can imply a sense of resignation or acceptance, rather than just facing a challenge head-on.	
	Anything more?	No, that should be all

	...	
Task 7: Multiple examples of the same idiom		
RAG	...	Hit the nail on the head
	Where did you hear this expression, or how was it used?	I actually don't remember, can you give me an example?
	Here's an example: @Analyst42 totally hit the nail on the head with that market prediction! In this example, @Analyst42 "hit the nail on the head" means they accurately predicted the market. The speaker is praising their accuracy, implying they got it right. The speaker uses the idiom to express approval and confidence in @Analyst42's prediction, showing appreciation for their correct assessment.	
	Here's an example: @Analyst42 totally hit the nail on the head with that market prediction! In the example, "hit the nail on the head" means that the analyst, @Analyst42, was extremely accurate in their market prediction. The speaker is expressing strong approval and agreement with the analyst's statement, showing that they thought the prediction was spot on.	
	Here's an example: @Analyst42 totally hit the nail on the head with that market prediction! In this example, @Analyst42 "hit the nail on the head" means they were very accurate with their market prediction. The speaker is showing approval and	

	agreement with their prediction, using the idiom to emphasize the analyst's correctness.	
	Anything more?	Can you give me another example?
	Here's an example: Did I hit the nail on the head when I suggested budget cuts? In the example "Did I hit the nail on the head when I suggested budget cuts?", the speaker is asking if their suggestion about reducing costs was exactly correct or accurate. They're seeking confirmation on the effectiveness of their idea, implying that they want to know if they were right in addressing the issue.	
	Here's an example: Did I hit the nail on the head when I suggested budget cuts? In the example, "Did I hit the nail on the head when I suggested budget cuts?", the speaker is asking if their suggestion accurately identified the issue. They're seeking confirmation that their idea was correct, using the idiom to convey precision and accuracy.	
	Here's an example: Did I hit the nail on the head when I suggested budget cuts? In the example, "Did I hit the nail on the head when I suggested budget cuts?", the speaker is asking if their suggestion was exactly right or accurately identified the issue. They're seeking	

	confirmation that their idea was correct and effectively addressed the problem.	
	Anything more?	Uh, I guess one last example please
	Here's an example: Her analysis hit the nail on the head by pinpointing the cause of delays. In this example, "Her analysis hit the nail on the head" means that her analysis was very accurate and precisely identified the cause of the delays. The speaker is praising her for her exactness and effectiveness in finding the solution.	
	Here's an example: Her analysis hit the nail on the head by pinpointing the cause of delays. In this example, "Her analysis hit the nail on the head" means that her analysis precisely identified the cause of the issue. She made an exact and accurate statement, which is what the idiom is getting at. The speaker is expressing their agreement and approval of her analysis, implying that it was spot on.	
	Here's an example: Her analysis hit the nail on the head by pinpointing the cause of delays. In this example, "Her analysis hit the nail on the head" means that her analysis perfectly identified the cause of the delays. She found the exact reason,	

	without any mistakes. The speaker is impressed and admiring her accuracy.	
	Anything more?	*no input* (wrong: said “Nope”)
	I didn't hear anything. Please try again.	I said no
	Thank you for exploring idioms with me! Click to ask again.	
LLM	...	Hit the nail on the head
	Where did you hear this expression, or how was it used?	I actually don't remember, can you give me an example?
	Here's an example sentence: "I finally understood the business plan, and I think you hit the nail on the head when you pointed out the flaw in the marketing strategy." In this sentence, "hit the nail on the head" means someone correctly identified a problem or made an accurate observation. The speaker is expressing their agreement with the other person's comment, acknowledging that they made a good point. The tone is one of appreciation and agreement.	
	Example sentence: "I really liked your presentation, you kept the nail on the head and explained the complex points in a way that was easy to understand." Explanation: This idiom means staying focused and accurate, especially when discussing a	

	complex topic. In this sentence, the speaker is saying that the presenter did a great job of explaining the subject matter clearly and precisely, with no room for misinterpretation. The phrase is used to show appreciation for the presenter's clear and effective communication.	
	Here's an example sentence: "The new marketing strategy really hit the nail on the head, increasing sales by 20% in just one quarter." Explanation: This idiom means to exactly understand or solve a problem. In this example, the company's new strategy is a perfect solution to their sales issues. The speaker uses this idiom to show that their idea is spot on and effective. The tone is positive and approving.	
	Anything more?	Can you give me another example?
	Here's another example: "After analyzing the test scores, the teacher said, 'You hit the nail on the head with your suggestion to increase the class size.'" In this sentence, "hit the nail on the head" means someone made a correct or insightful suggestion. The teacher is acknowledging that the student's idea was a good one.	

	Example sentence: "The market researcher's analysis of the target audience was spot on, thanks to the clever way the team kept the nail on the head by considering every demographic and psychographic factor." Explanation: In this sentence, "keeping the nail on the head" means staying precise and accurate in one's analysis or understanding. The researcher's team successfully applied this idiom by carefully considering all aspects of the target audience, resulting in a thorough and accurate analysis.	
	Here's another example: "After conducting the market research, our team leader finally hit the nail on the head, identifying the target audience and creating a marketing campaign that resonated perfectly with them." Explanation: This idiom means to exactly understand or solve a problem. In this example, the team leader's research perfectly identifies the target audience and creates a successful marketing campaign. The speaker uses this idiom to praise the team leader's accuracy and effectiveness.	
	Anything more?	Uh, I guess one last example please

	Here's another one: "The pollster said she really hit the nail on the head with her prediction of the election winner, as the actual result matched her forecast exactly." In this sentence, "hit the nail on the head" means the pollster made a correct prediction. The speaker is expressing their agreement that the pollster's prediction was accurate.	
	Example sentence: "I was impressed by the contestant's answers on the quiz show, she really kept the nail on the head and answered all the tricky questions correctly, which earned her a big prize." Explanation: In this sentence, the idiom "keeping the nail on the head" means being correct and precise in one's responses, especially in a challenging or difficult situation. The contestant's ability to answer all the questions correctly was a key factor in her winning the prize, showcasing her sharp and accurate thinking.	
	Here's another example: "The detective was able to crack the case by hitting the nail on the head, suspecting the correct person and finding enough evidence to prove their guilt." Explanation: This idiom means to exactly understand or solve a problem. In this	

	example, the detective's insight is perfect, leading them to the right person and solution to the case. The speaker uses this idiom to show that the detective's deduction was accurate and effective.	
	Anything more?	Nope
	Thank you for exploring idioms with me! Click to ask again.	
Task 8: Context provided before idiom (+ examples + details)		
RAG	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	My manager told me I should go home because I was so exhausted
	Which idiom would you like to know about?	And he said, spreading the candle at both ends. What does that mean? (wrong: said “Uh, I think he said I was burning that candle at both ends. What does that mean?”)
	Sorry, I didn't understand. Could you rephrase that?	What does burning the candle at both ends mean?
	Sorry, I couldn't find that idiom in my database. Could you try saying it differently?	Burn the candle at both ends
	Sorry, I didn't understand. Could you rephrase that?	What does burn the candle at both ends mean?
	In your manager's words, "burn the candle at both ends" means you're overworking and not taking enough rest. The phrase 'burn the candle at both ends' means to work too much and not take care of yourself, so you get very tired. The phrase is saying you're going to "burn" out (get extremely tired) because you're working too much	

	and not giving yourself enough rest.	
	When your manager told you to go home, they were probably saying you should take it easy and rest, because you were overworking and staying up late. "Burning the candle at both ends" means to work too hard, stay up too late, and get really tired.	
	In this situation, "burn the candle at both ends" means you've been working too hard and not taking enough time to rest, leading to physical and mental exhaustion. Your manager is likely telling you to stop pushing yourself so hard, so you can recover and avoid burning out.	
	Anything more?	Give me another example
	Here's an example: After months of burning the candle at both ends, the artist finally collapsed from exhaustion. This example means the artist, who was very dedicated to their work, overextended themselves by working too many hours without rest. The "burning candle" part of the phrase is a way of saying they were exhausting themselves, not just physically, but also mentally and emotionally.	

	Here's an example: After months of burning the candle at both ends, the artist finally collapsed from exhaustion. This example uses the idiom "burn the candle at both ends" to show that the artist overworked extremely hard, neglecting rest and self-care. The speaker implies that the artist's constant exhaustion is a consequence of their excessive work.	
	Here's an example: After months of burning the candle at both ends, the artist finally collapsed from exhaustion. In the example, "After months of burning the candle at both ends, the artist finally collapsed from exhaustion," the idiom "burning the candle at both ends" means the artist was overworking and exhausting themselves for a long time. This resulted in them physically and mentally collapsing from lack of rest and energy. The speaker likely used this expression to convey that the artist's prolonged overwork led to a point of complete exhaustion, where they couldn't continue without serious consequences. The tone is somewhat cautionary, warning others about the dangers of overworking and neglecting self-care.	

	Anything more?	In what setting would I usually use this idiom?
	You'd usually use this idiom in a situation where someone is talking about someone who's been working too hard and is exhausted, like after a long workweek or a marathon project.	
	You'd usually use "burn the candle at both ends" in a situation where you're commenting on someone who's been overworking or neglecting their rest, often because they're putting in too much effort, like a manager advising an exhausted employee to take it easy.	
	You'd typically use "burn the candle at both ends" in a neutral setting, like in everyday conversation with friends or colleagues, to describe a situation where someone's been overworking and needs to take a break.	
	Anything more?	No, thank you
	Thank you for exploring idioms with me! Click to ask again.	
LLM	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	My manager told me I should go home because I was so exhausted
	Which idiom would you like to know about?	I think, he said, burning the candle at both ends
	Sorry, I didn't understand. Could you rephrase that?	He said I was burning the candle at both ends. What does that mean?
	In this situation, "burning the candle at both ends" means working or living too much, often for too long, and using up your energy	

	and resources too quickly. It's like the candle is being burned at both ends, so it doesn't last very long. In this case, your manager is suggesting that you need to take a break and rest, because you're burning out.	
	When someone's "burning the candle at both ends," it means they're overworking, pushing themselves too hard, and not taking enough rest. You're using up all your energy, leaving you exhausted and burnt out.	
	In this situation, "burning the candle at both ends" means overworking and not taking enough rest. It's like constantly using a candle without letting it rest, which can cause it to burn out quickly. Your manager is likely suggesting that you're pushing yourself too hard, and you need to take a break to avoid exhaustion.	
	Anything more?	Give me another example
	Example sentence: "I've been playing video games for hours, I'm burning the candle at both ends, I think I need to go to bed soon." Explanation: In this sentence, the speaker is aware they've been working too hard and are running out of energy. The phrase "burning the candle at both ends" is used to express their concern and suggest they need to stop	

	and rest. The tone is self-aware and slightly worried.	
	Here's another example: "After working a 12-hour shift, John said he was exhausted. His colleague told him to take it easy, saying he was burning the candle at both ends." Explanation: This idiom is used to advise John to take a break and rest, as he's been working too much and is likely feeling tired. The tone is cautionary and concerned for John's well-being.	
	Here's another example: "Hey, I'm so tired today, I've been working non-stop for the past week, and I'm starting to burn the candle at both ends. I think I need to take a few days off to recharge." In this example, the speaker is using the idiom to express their exhaustion and need for rest, implying that they've been overworking and need to take a break to avoid burnout.	
	Anything more?	In which setting would I usually use this idiom?
	Sorry, I didn't understand. Could you rephrase that?	In what setting would I usually use this idiom?
	You would usually use the idiom "burning the candle at both ends" in a formal or informal conversation with a friend, family member, or colleague who is	

	expressing concern about your well-being or productivity. It's a common way to discuss work-life balance or someone's physical or mental exhaustion.	
	You'd usually use "burning the candle at both ends" in a workplace or professional setting, like with colleagues, to advise someone who's overworking.	
	You'd usually use "burning the candle at both ends" in a conversation with someone you trust, like a friend or a family member, who's concerned about you. It's often used in informal settings, like at home or with colleagues who are close to you.	
	Anything more?	No, thank you

Task 9: Idiom with multiple meanings		
RAG	...	My friend said the ball was in my court during a conversation outside, but we weren't playing anything. Is that an idiom?
	Sorry, I couldn't find that idiom in my database. Could you try saying it differently?	The ball is in your court
	Yes, "the ball is in your court" is an idiom. It means the next decision or action is yours. Your friend likely said it to indicate they're done and now it's your turn to take a stand or make a decision. The phrase uses a sports metaphor, suggesting the	

	conversation is in a competitive or game-like situation, even if you're just chatting outside.	
	Yes, that's an idiom. It means the other person has made a decision or played their part, and now it's up to you to take action. Your friend likely said it to tell you it's now your turn to respond or take responsibility.	
	Yes, that's an idiom. It means your friend is saying it's now your responsibility to decide what to do next or take action, as opposed to waiting for them to make a move.	
	Anything more?	Uh, no
	...	
LLM	...	My friend said the ball was in my court during a conversation outside, but we weren't playing anything. Is that an idiom?
	Yes, that's an idiom. "In my court" means the conversation or situation is now happening to you. Your friend is saying the ball of conversation is now yours to act on, make a decision, or respond.	
	Yes, "in my court" is an idiom. It means the situation or decision is now up to you. Your friend is suggesting you should take the next step or make a decision.	
	Your friend used an idiom "in my court". This means the responsibility or decision is now yours. They're saying the situation	

	has shifted, and it's up to you to decide or act next.	
	Anything more?	No
	...	
Task 10: Switching between idioms		
RAG	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	What does under the weather mean? My friend said that she was that
	When your friend said she was "under the weather," she means she's feeling unwell, likely with a cold or flu. The speaker, probably someone else like a family member, friend, or doctor, might be saying that to convey their concern for her health.	
	When your friend said "she was under the weather", she meant that she was feeling unwell, probably with a mild cold or flu. It's like the weather outside, but inside her body.	
	When your friend said she was "under the weather," it means she's feeling unwell, likely with a cold or flu. She might be experiencing mild symptoms like a sore throat, headache, or fatigue. In this context, the speaker's likely intention is to share their concern or ask how you're feeling, showing empathy and care for their friend.	
	Anything more?	Now explain cost an arm and a leg
	Where did you hear this expression, or how was it used?	My brother said that his new laptop cost an arm and a leg

	Your brother said the laptop is very expensive, costing almost as much as he'd be willing to give up a limb, literally! He's saying it's pricey, not that he's willing to lose a limb, of course.	
	When your brother said his new laptop cost "an arm and a leg," it means the laptop is very expensive. He's using an idiom to convey that the cost is extremely high, rather than literally losing a limb. In this context, the speaker's likely intention is to express surprise or frustration at the high price, possibly implying that they think the laptop isn't worth the cost.	
	"Cost an arm and a leg" means something is very expensive. When you say your brother's new laptop costs an arm and a leg, you're expressing that you think it's too pricey, and you're unlikely to agree to buy it. (LLM changed context to “My brother said it yesterday.” during extraction, even though ASR was correct)	
	Anything more?	Uh, that's all

LLM	Welcome to Idiomagic - your personal idiom explainer. Which idiom is on your mind today?	What does under the weather mean? My friend said that she was that

	When your friend says she's "under the weather," it means she's feeling unwell or sick, often with a cold or flu. It's like saying "I'm not feeling great" or "I'm not well." Her likely intention is to let you know that she's not feeling well, so you can maybe not hang out with her or offer her some help. The speaker might not be you, in this case, it's your friend.	
	When someone says "I'm under the weather," it means they're feeling unwell, usually with a cold or flu. They're not feeling their best. Your friend is likely saying you're not feeling well, probably because you're sick.	
	When someone says "I'm under the weather," it means they're feeling unwell or sick. It's a common way to say "I'm not feeling well." In this situation, your friend likely said it because they're not feeling their best, maybe they're sick or feeling under the influence of something like a cold or flu. The speaker might not be your friend, though - maybe it's someone else you know, like a coworker or family member, who's saying it to you.	
	Anything more?	Now explain cost an arm and a leg

	Where did you hear this expression, or how was it used?	My brother said that his new laptop cost an arm and a leg
	When your brother says his new laptop "cost an arm and a leg," it means it was very expensive. He's exaggerating to show how pricey it was, comparing it to losing a body part.	
	"Cost an arm and a leg" means something is very expensive. It's an exaggeration, saying that the price is so high, it's almost like you'd have to give up a limb to pay for it. (LLM invented different context during extraction!)	
	When someone says "something costs an arm and a leg," it means that the price is extremely high. In this situation, your brother means that his new laptop is very expensive, probably too expensive.	
	Anything more?	No, that's all

Observations:

- RAG
    - Idioms
        - Only accepts idioms in the database or very close matches
    - Examples
        - Always gives same examples in same order
        - Finite
        - Not always correct about speaker
            - Context: "What does under the weather mean? My friend said that she was that."

                - LLM explanation: “[...] The speaker might not be your friend, though - maybe it's someone else you know, like a coworker or family member, who's saying it to you.”

- LLM
    - Will always provide an answer
        - Not dependent on content of database
    - Idioms
        - Accepts all idioms
    - Examples
        - Sometimes weird format
            - “Example: ... Explanation: ...”
        - Repeats parts of the prompt
            - “The speaker might not be the user”
        - Often does not even generate a proper example sentence
        - Sometimes a bit weird
            - "Under the weather" means feeling unwell or ill, often with a cold or flu. Your friend is saying she's not feeling great. The speaker, likely someone else, is saying your friend is ill, but might not be the one describing the situation.
